The screenshot shows the phpMyAdmin interface for a database named 'kendaraan'. The left sidebar displays the database structure, including tables like 'jenis', 'kendaraan', 'mesin', and 'type'. The main panel shows a SQL query that has been executed, displaying 5 rows of data. The query is a complex JOIN statement involving tables 'jenis', 'kendaraan', and 'mesin'. The results table has columns: nama\_kendaraan, nama\_type, nama\_jenis, and nama\_mesin. The data rows are as follows:

nama_kendaraan	nama_type	nama_jenis	nama_mesin
Motor	uer2	Matik	China
Motor	231h	Bebek	China
Mobil	123s	Bebek	Jepang
Mobil	321h	Bebek	Jepang
Mobil	232i	Matik	China

```
SELECT c.nama_kendaraan, b.nama_type, a.nama_jenis, d.nama_mesin FROM jenis a
JOIN type b ON a.id_jenis=b.jenis_id JOIN kendaraan c ON b.kendaraan_id=c.id
kendaraan JOIN mesin d ON b.mesin_id=d.id_mesin ORDER BY c.nama_kendaraan DE
SC;
```
